

6th International Conference on Speech Motor Control

Groningen - Nijmegen, June 8-11 2011

www.slp-nijmegen.nl/smc2011/

Satellite Workshop

Apraxia of speech: Mechanisms and symptoms.

June 8, 1:30 – 5:30 p.m.

Organizers: Wolfram Ziegler, Ingrid Aichert, Anja Staiger (München)

Program

1:30 Welcome and Introduction

Wolfram Ziegler

1:45 Phonetic vs. phonemic errors (Chair: *Strauss-Hough*)

1:45 The source of sound substitution errors – phonologic or motoric?

Linda Shuster

2:00 Phonetic errors and segmental/syllabic simplifications: The hallmarks of a type of apraxia of speech?

Cristina Romani & Claudia Galluzzi

2:15 Patterns of impairments in apraxia of speech and mechanisms of interaction between phonological and phonetic encoding.

Marina Laganaro

2:30 Discussion

2:45 Diagnostic criteria and differential diagnosis (Chair: *Croot*)

2:45 Error variability in apraxia of speech – a matter of controversy.

Anja Staiger & Wolfram Ziegler

3:00 Transparency and reliability in the clinical assessment of apraxia of speech.

Adam Jacks & Katarina Haley

3:15 Discussion

3:30 Coffee break

4:00 Nonspeech oral impairment and other correlates of AOS (Chair: *Duffy*)

4:00 Patterns of non-speech oral movement impairment in acquired apraxia of speech.

Rosemary Varley, Sandra Whiteside & Andrew Harbottle

4:15 Speech planning happens before speech execution: An argument for using reaction time measures in apraxia of speech.

Edwin Maas

4:30 Discussion

4:45 The contribution of primary progressive AOS (Chair: *Laganaro*)

4:45 Apraxic versus phonological errors in primary progressive aphasia.

Karen Croot, Kirrie Ballard & John R. Hodges

4:55 Developing criteria for AOS diagnosis: Why the inclusion of neuro-degenerative etiologies may be important.

Joseph R. Duffy

5:05 Discussion

5:15 Conclusions

Wolfram Ziegler

5:30 End
